On the road with Spevco and the US army

About digiLED

Manufacturers and suppliers of the new digiLED range of LED video screens and scoreboards, the people behind the digiLED product range are some of the most experienced in the business. Its highly skilled team has been instrumental in identifying market needs, sourcing the right product in China, with Asia-based experts on the ground to oversee testing and manufacture of the digiLED product range.

The result is that digiLED can offer a full range of indoor and outdoor LED screens and technology to suit all applications from football stadiums and concerts to innovative creative solutions for state of the art projects. The product range is based on unrivalled value but incredible quality at very competitive prices.

**Big pictures,
small prices**

SPEVCO, the leading specialist trailer manufacturer, recently took delivery of 3 digiLED d6 screens for a contract to supply the US Army with three trailers for its Virtual Army Experience recruitment tour.

Key to this project was the ability to meet tight deadlines, digiLED had just 35 days to design, manufacture and deliver all the modules.

APPLICATION

Working closely with VideoWalltronics, the AV system integrator for this project, digiLED made sure that all the modules were delivered on time and within budget.

Versatility is a major feature of digiLED's range of products and its ability to design and manufacture bespoke size modules to SPEVCO's specific requirements was crucial. Not only was space maximised by using these bespoke modules but also SPEVCO's need for the highest possible resolution screen was fulfilled with the screens having an effective resolution of 384 x 288.

The quality of the digiLED d6 image at a value price was what finally sealed the deal for SPEVCO.

SCREEN DETAILS

A bespoke module of 800mm wide x 900mm was specially designed and manufactured. Assembled in a 3x3 configuration the screens are mounted onto three separate trailers. Each screen measured 2.4 metres wide x 1.8 metres high. PC-based LED manager processing software was supplied with each screen.

COMMENTS FROM THE PEOPLE INVOLVED:

"With regard to the LED screens, we needed quality screens in a hurry and at a competitive price. Because letting down the US Army was not an option, we evaluated our sources and considering the high recommendation from VideoWalltronics, the digiLED team was selected. They manufactured the screens and delivered to us in 35days. The US Army and Ignited Minds are very pleased with the product, results, and the ability to stay in budget."

Marty Tharpe CEO of SPEVCO Inc

"I have personally worked with the assembled digiLED team since 1999. I hold the highest level of respect of their combined experience, knowledge and understanding of today's markets. In my opinion, there is no other manufacturer I would trust to deliver our screens on time, within budget, and of the quality they represent."

Mitch Kaplan, VideoWalltronics
